- 12.6 Clause 12.5.3 will not apply to the Confidential Information referred to in clause 12.1.2.

Mabdeck (Billing) Module Service Schedule

In this Mabdeck (Billing) Module Service Schedule, “**you**” means the Customer, “**your**” means the Customer’s.

1. Overview

The Mabdeck (Billing) Module Service is a module within the Mabdeck Software that allows you to generate statements or bills to registered consumers for utility consumption and other non-utility costs.

There are a number of optional features within the Mabdeck (Billing) Module Service which can be activated by the agreement of the parties in writing, including:

- (a) the ability to enable End Consumers to login to the Service, where an account has been set up for the consumer by you;
- (b) “Credit Control” which flags to you where payment on an End Consumer account has become overdue and provide you with relevant billing and payment details;
- (c) “Data Analytics” which provides analysis of and flags exceptions within Customer Data in accordance with criteria set by you.

2. Specification

- 2.1 The Mabdeck (Billing) Module Service is intended to enable the Customer to set up networks, supply points, property locations and metering/ data collection information/ PAYG meters in the Mabdeck Portal in a standard .csv format that is available to download through the Mabdeck Portal.
- 2.2 The Mabdeck (Billing) Module Service will enable the Customer to filter information by different bandings by reference to particular Properties which the Customer may use for validation of consumption data, tariff setting, and comparing tariffs against different utility supplies.
- 2.3 The Mabdeck (Billing) Module Service will enable the Customer to raise invoices consisting of:
 - 2.3.1 fixed charges for the relevant Authorised Meter calculated on a daily basis in relation to the relevant End Consumer’s account; and
 - 2.3.2 the variable elements of an End Consumer’s consumption as recorded by the relevant Authorised Meter designated to that End Consumer.
- 2.4 If an end-date is specified for a tariff, no further charges for the relevant utility supply (or supplies) will be generated until a new tariff is added to the relevant Authorised Meter and/or End Consumer account.
- 2.5 The Mabdeck (Billing) Module Service will enable End Consumer accounts to be set up to have a billable person and billable address which is different to the account address for the End Consumer.
- 2.6 The Mabdeck (Billing) Module Service will enable Customer accounts to be connected to multiple Properties with each Authorised Meter allocated to either a “Property Owner” or “Resident”. If an Authorised Meter is not allocated to a Resident then the Authorised Meter will be automatically charged as a Property Owner account.
- 2.7 The Mabdeck (Billing) Module Service will enable a range of billing communication templates to be set up, including:
 - 2.7.1 statements;
 - 2.7.2 invoices;
 - 2.7.3 welcome letters;
 - 2.7.4 direct debit letters;
 - 2.7.5 credit control letters.

- 2.8 Each of the communication templates can be edited by the Customer to the Customer's individual branding requirements and re-uploaded to the Mabdeck Software. The templates have the ability to be automatically populated with data from the Mabdeck (Billing) Module Service. You must ensure that any amendments to the communication templates created, edited and/or requested by you do not constitute, create and/or otherwise result in a violation and/or infringement of any rights (including the Intellectual Property Rights) of any third party. Sycous shall have no Liability to you in the event that any communication templates created, edited and/or requested by you violate and/or infringe any rights (including the Intellectual Property Rights) of any third party. You will indemnify Sycous against all losses (including all direct, indirect and consequential losses), liabilities, costs (on a full indemnity basis) including legal and other professional costs and costs of enforcement, damages and expenses that Sycous does or will incur or suffer, in each case arising out of or in connection with any actual or alleged claim or proceedings made, brought or threatened against Sycous by any person for actual or alleged infringement of a third party's rights (including Intellectual Property Rights) arising out of or in connection with any communication templates created, edited and/or requested by you (including all legal and other professional costs and costs of enforcement, damages and expenses that Sycous does or will incur or suffer as a result of defending or settling any such actual or threatened claim or proceeding).
- 2.9 The Mabdeck (Billing) Module Service will enable the following data to be uploaded using a specified .csv format:
- 2.9.1 Authorised Meter readings;
 - 2.9.2 payments;
 - 2.9.3 Properties;
 - 2.9.4 supply points;
 - 2.9.5 Authorised Meters;
 - 2.9.6 End Consumer accounts.
- All other data or changes must be made by the Customer directly within the Mabdeck (Billing) Module Service.
- 2.10 The Customer will be able to use the Mabdeck Portal to generate statements of consumption across all Authorised Meters, covering all utility supplies with an applicable tariff on a scheduled or one-off frequency. The scheduled frequency can be set on a weekly, monthly or quarterly basis. Where a scheduled statement generation is set, the Customer must set a 'statement up to' date. The 'statement up to' date is the end period for the relevant statement. The Customer must also set an "offset period" which allows a period of time between the 'statement up to' date and the date on which the relevant statement is actually generated to enable data to be consolidated and any potential data issues to be resolved prior to the relevant statements being generated.
- 2.11 The Mabdeck (Billing) Module Service will enable the Customer to manually review and re-generate statements before they are deemed a financial account transaction or are automatically posted to the accounts.
- 2.12 The Mabdeck (Billing) Module Service will enable the Customer to apply one-off fixed or percentage charges and/or discounts to account statements based on Property, band or network.
- 2.13 Statements will only generate where there is an active Authorised Meter account, supply point, Authorised Meter, band and tariff and the Customer has provided all required data.
- 2.14 All consumption charges will be based on readings available in the Mabdeck (Billing) Module Service. The start reading for any Authorised Meter during a consumption period will be the end reading for that Authorised Meter from the previous consumption period. The last reading of a consumption period will be the reading that appears as the reading on the relevant "statement up to" date. "Statement up to" and end readings will be prioritised in the following order:
- 2.14.1 automated meter read through the Data Ingestion Service;
 - 2.14.2 manual meter read;

2.14.3 Customer meter read;

2.14.4 estimated meter read.

If any metering data is not available, Sycous will attempt to generate estimates based on either historic consumption of the Authorised Meter or an average consumption across meters in the same Customer-defined band or network.

2.15 Where a previous estimate has been used for a statement and one of the following readings is now available:

2.15.1 automated meter read through the Data Ingestion Service;

2.15.2 manual meter read; or

2.15.3 Customer meter read,

the Mabdeck (Billing) Module Service will reflect any necessary adjustment/credit amount or debit amount on the next statement.

2.16 Where an End Consumer account ends, an end-date can be entered for that account and a final statement will reflect up to that date for that account and/or Property.

2.17 All statements will be available in a .pdf format for download, printing and postage by the Customer. Alternatively, a server location can be entered and all statements will be available in the specified server location.

2.18 The Mabdeck (Billing) Module Service allows End Consumers to have access to the Mabdeck Portal for the purposes of e-billing and online account access. The Customer will be able to provide End Consumers with access to the Mabdeck (Billing) Module Service by providing the End Consumer with a unique link emailed to the End Consumer or a unique code provided to the End Consumer.

2.19 Any End Consumer with online account access will cease to have their statements generated for download by the Customer. Instead the End Consumer will receive an emailed notification that their statement is available on their online consumer account.

2.20 All statements generated in the Mabdeck (Billing) Module Service will enable the Customer to set credit control stages (such as when payments are due or when payments become overdue by a specified period). The Customer can use these stages to prompt specific actions for the Customer's credit control team, such as:

2.20.1 telephone call;

2.20.2 email (accounts with online account access); or

2.20.3 letter.

2.21 The Mabdeck (Billing) Module Service will enable the Customer to allocate a priority order to each of the actions following a credit control notification. However, if any necessary data is not available (e.g. if a telephone number is selected but the account does not have a telephone number), then no action will be triggered. Where required data is missing, the Mabdeck (Billing) Module Service will trigger the next action in the priority list for which the necessary information is available (e.g. if sending a letter had second priority to a call, then a letter would be generate in place of a call where no telephone number is provided).

2.22 All credit control emails will be automatically generated and be sent out by the Mabdeck (Billing) Module Service in the Customer's chosen format.

2.23 All credit control telephone calls will automatically generate a prompt to Permitted Users in the Mabdeck (Billing) Module Service to make a telephone call.

2.24 All credit control letters will be made available in a .pdf format for download, printing and postage by the Customer. Alternatively, a server location can be entered and all credit control statements will be available in the specified server location.

- 2.25 The Mabdeck (Billing) Module Service will enable the Customer to search for individual accounts within the Mabdeck Portal and view / manage the Mabdeck (Billing) Module Service against the following criteria:
- 2.25.1 account Information;
 - 2.25.2 online consumer account;
 - 2.25.3 credit control hold status to suppress credit control;

 - 2.25.8 notes, including the ability to add and schedule reminders from notes and look at the note history on an individual account;
 - 2.25.9 End Consumer account history including all statements generated, payments received from the End Consumer and current balance information.
- 2.26 The Mabdeck (Billing) Module Service will enable the administration of receipt of direct debits. All collection and other BACS files are not included in the Mabdeck (Billing) Module Service and would need to be managed and claimed through the Customer's own internal processes and/or systems.
- 2.27 Authorised User access to the Mabdeck (Billing) Module Service can be restricted by reference to specific networks and/or specific modules including being restricted to one or more of the following pages:
